

CLAIM AMENDMENTS

1. (Currently Amended) A compound of formula:

wherein X is a spacer comprising at least one amino acid residue, and Y comprises ~~an~~ an aromatic benzoimidazolyl group.

2. (Original) A compound of formula:

wherein R' is selected from the group consisting of

3. (Original) A composition comprising at least one compound of claim 1 and a carrier.

4. (Original) A composition comprising at least one compound of claim 2 and a carrier.

5. (Currently Amended) A method of ~~treating~~ antagonizing a  $\delta$ -opioid receptor in a mammal in need of an antagonist of a  $\delta$ -opioid receptor thereof, which method comprises administering at least one compound of formula:

wherein R' is selected from the group consisting of:

in an amount that antagonizes ~~a~~ the  $\delta$ -opioid receptor in said mammal, whereupon the  $\delta$ -opioid receptor in said mammal is antagonized.

6. (Original) The method of claim 5, wherein the compound is administered in an amount that also agonizes a  $\mu$ -opioid receptor in said mammal.

7. (Currently Amended) A method of ~~treating~~ agonizing a  $\delta$ -opioid receptor in a mammal in need ~~of an agonist of a  $\delta$ -opioid receptor~~ thereof, which method comprises administering at least one compound of formula:

wherein R' is

in an amount that agonizes ~~a~~ the  $\delta$ -opioid receptor in said mammal, whereupon the  $\delta$ -opioid receptor in said mammal is agonized.

8. (Currently Amended) A method of ~~treating~~ agonizing a  $\mu$ -opioid receptor in a mammal in need ~~of an agonist of a  $\mu$ -opioid receptor~~ thereof, which method comprises administering at least one compound of formula:

wherein R' is

in an amount that agonizes ~~a~~ the  $\mu$ -opioid receptor in said mammal, whereupon the  $\mu$ -opioid receptor in said mammal is agonized.

9. (Original) A compound of formula:

wherein R' is

10. (Currently Amended) A method of ~~treating~~ antagonizing a  $\delta$ -opioid receptor and agonizing a  $\mu$ -opioid receptor in a mammal in need ~~of an antagonist of a  $\delta$ -opioid receptor and an agonist of a  $\mu$ -opioid receptor~~ thereof, which method comprises administering the compound of claim 9 in an amount that antagonizes a the  $\delta$ -opioid receptor and agonizes a the  $\mu$ -opioid receptor in said mammal, whereupon the  $\delta$ -opioid receptor is antagonized and the  $\mu$ -opioid receptor is agonized in said mammal.
